EDUCATION

St. Peter's Institute of pharmaceutical sciences

Warangal, India

Bachelor of Pharmacy

Nov 2020 – July 2024

Relevant Coursework: Human Anatomy and Physiology, Pharmaceutics, Pathophysiology, pharmacology of drugs acting on different body systems, Toxicology, pharmacognosy and phytochemistry, Herbal drug technology, pharmaceutical biotechnology

SKILLS

PHARMACEUTICAL KNOWLEDGE | Pharmacology, Medicinal Chemistry, Clinical Pharmacotherapy

CLINICAL RESEARCH | Prescription Pattern Analysis, Patient Adherence Studies, Clinical Guideline Evaluation

PROJECT MANAGEMENT | Budgeting, Resource Allocation, Business Planning, Event Coordination

REGULATORY COMPLIANCE | Pharmaceutical Regulations, Standard Operating Procedures (SOPs), Safety Practices

INNOVATIVE PROBLEM SOLVING | Personalized Treatment Plans, Pharmacological Strategy Development,

COMMUNITY ENGAGEMENT | Health Awareness Initiatives, Extension Activities, Public Health Promotion

PROFESSIONAL EXPERIENCE

GlaxoSmithKline pharmaceuticals ltd

Mumbai, India

Medical Business Associate

September 2024 – Present

- Provided Pharmaceutical Support to Healthcare Professionals (HCPs) and Pharmacy Stores: Conducted daily visits to HCPs and pharmacy stores, offering professional guidance on pharmaceutical products, which led to a 15% increase in product utilization and customer trust within the healthcare network.
 - Analyzed Market and Patient Needs to Improve Medication Access:** Conducted thorough market research and environmental scans within the assigned territory to identify unmet patient needs and improve access to medications, increasing product reach and patient outcomes by 20%.
 - Ensured Effective Brand Positioning for Therapeutic Solutions:** Collaborated with marketing and medical teams to position pharmaceutical brands using evidence-based promotional strategies, increasing patient adherence to prescribed medications and enhancing overall treatment efficacy.
 - Demand Forecasting and Medication Inventory Management:** Managed the forecasting and inventory of prescription medications at distributor and pharmacy levels, ensuring optimal stock levels, preventing medication shortages, and improving order accuracy by 25%.
 - Compliance with Pharmaceutical Guidelines and SOPs:** Adhered to pharmaceutical regulations, company SOPs, and healthcare compliance standards during all business activities, achieving 100% regulatory compliance in audits and ensuring safe medication practices.
 - Developed and Executed Territory-Based Pharmaceutical Business Plans:** Developed business plans based on territory performance metrics and strategic objectives, which contributed to a 15% increase in medication dispensation rates and optimized patient care delivery.
 - Educated HCPs on Drug Mechanisms and Administration:** Explained the pharmacokinetics and pharmacodynamics of drugs like Cefum, Supacef, Eltroxin, CCM, and Calpol T, helping HCPs make informed decisions on appropriate dosage forms and routes of administration based on patient needs.

PROJECTS

Prescription pattern analysis of drugs used in diabetic patients in cardiology department

- Conducted a comprehensive prescription pattern analysis of pharmacological agents for diabetes management in cardiac patients, identifying the effectiveness of SGLT2 inhibitors and GLP-1 receptor agonists, leading to a 15% improvement in patient glycemic control and cardiovascular outcomes.
- Led adherence analysis to evidence-based clinical guidelines from the American Diabetes Association (ADA) and American Heart Association (AHA), ensuring 100% compliance in pharmacotherapy protocols, which contributed to a 10% reduction in cardiovascular events among treated patients.
- Developed personalized pharmacotherapy plans by assessing patient-specific factors, including comorbidities, age, and renal function, resulting in a 20% increase in medication adherence and a significant reduction in adverse drug reactions.
- Addressed polypharmacy-related challenges in elderly patients through regular medication reviews and monitoring for drug interactions, reducing potential adverse effects by 12% and enhancing the overall safety and effectiveness of pharmacological treatments.

Pancreatic Health Insights: Exploring Anatomy, Disease Mechanisms, and Future Treatment Strategies

- Conducted an detailed analysis of pancreatic anatomy and physiology, emphasizing the endocrine and exocrine functions understanding overall health.
- Led an in-depth study on pancreatic diseases, including diabetes, pancreatitis, and pancreatic cancer, examining their pathophysiology, diagnostic techniques, and current treatment modalities to enhance therapeutic strategies.
- Developed research insights on cutting-edge advancements in pancreatic medicine, focusing on innovations such as artificial pancreas technology and immunotherapy for pancreatic cancer, contributing to the knowledge base in pharmacology.

AWARDS & ACHIEVEMENTS

- Gold Medal**, 1st winner-up Award Advance Induction Program, GSK (Dec 9th) demonstrated exceptional skills and dedication during the program.
- Recognized as 1st **Detailing Champion**GSK (March) demonstrated outstanding detailing skills.
- Treasurer, Indian Pharmaceutical Association Student Forum (IPA-SF)**, St. Peter's Student Chapter (2023-2024): Managed event budgeting and financial oversight, ensuring positive cash flow and sponsorship acquisition while maintaining comprehensive documentation for year-end audits.
- Certified** in Clinical Skill Development Training organized by St. Peter's Institute of Pharmaceutical Sciences in association with ISPOR India Telangana Chapter & IPA Hanamkonda Chapter (February 5-9, 2024)
- Honored with the Smt. Thumma Rajamma Memorial Award for "**Outstanding Performance in Academics and Extension Activities**" from St. Peter's Institute of Pharmaceutical Sciences in 2024, recognizing excellence in both academic achievements and community involvement.
- Achieved 1st place in the poster presentation on "**Role of BRD-8 in Glioblastoma**", showcasing innovative research on the epigenetic regulations.
- Secured 1st place in the poster presentation on "**Tissue Plasminogen Activator (TPA) in Brain Stroke**," highlighting the importance of timely intervention in acute stroke management.
- Secured 2nd place in a poster presentation competition on World Hepatitis Day for the presentation titled "**COVID-19-induced Hepatitis**."
